Dear Commissioners,

I ask that you direct your Charter officers to be available throughout the day in the event that revisions or additional changes to these Charter amendments are requested by any Commissioner or Charter Review Committee member.

This is of the utmost importance. It is difficult to believe that we are in this position, working against the clock at the eleventh hour with no margin for error, to finalize ballot measures that must be submitted to the Miami-Dade Elections Department by the end of the day today. Given the significance of these proposed Charter amendments, there is simply no excuse for not having the necessary staff available to ensure they are drafted accurately and completely.

Additionally, how can I obtain the original versions of these ballot questions, including the redlined drafts and, for any brand-new additions to the Charter, the versions as they were discussed and drafted by the committee? I need these as soon as possible.

Sincerely,

Barbara Kramer
